October 27, 2024

Dear Prof. Sudhir Vempati,

I am so distressed to learn the passing away of Prof. Rohini Godbole. I would like to express my sincerest condolences and sympathy to you.

Rohini is a great physicist who made many important contributions to the particle physics, including collider physics, in particular top and Higgs physics. She has also done significant work in other areas such as supersymmetry.

She is well known for her great consulting works all over the world for her expertise in the above areas. In particular, she greatly helped the development of China's high energy physics program, Circular Electron Positron Collider (CEPC), serving as a member of advisory committee. We are truly grateful to her help.

It is hard to believe that we are going to miss her. She will be with us forever.

Best regards

Prof. Yifang Wang

IHEP
